I. Has a Nuclear disaster hit America?

Japan's Fukushima's nuclear power plant fiasco continues to worsen.

NEWS BRIEF: "[The US Is Having A Catastrophic Nuclear Emergency In Nebraska And The Obama Administration Is Covering It Up -- Russia](#)", Business Insider, June 19, 2011

"Here's an interesting report from Pakistan's daily newspaper The Nation. It cites a Russian regulatory agency as saying that the US is currently having a major nuclear emergency at the flooded plant in Nebraska and that the Obama Administration is trying to cover it up."

If the Obama Administration is caught lying to the American people on such a serious matter and then covering it up, the President will have once again betrayed the lofty ideals on which he campaigned for the White House in 2008, and he will set himself up for almost certain defeat in his re-election bid of 2012.

But, wait a minute. Can a report from Pakistan and Russia be believed? After all, Pakistan is presently moving out of the American orbit and information from Russia is traditionally unreliable. Business Insider notes these facts, but continues:

"But the FAA has [enacted a no-fly zone over the Fort Calhoun nuke plant](#), which was damaged by a fire and flooding from the Missouri river. Here's the report from The Nation:

"A shocking report prepared by Russia's Federal Atomic Energy Agency (FAAE) on information provided to them by the International Atomic Energy Agency (IAEA) states that the Obama regime has ordered a 'total and complete' news blackout relating to any

information regarding the near catastrophic meltdown of the Fort Calhoun Nuclear Power Plant located in Nebraska. According to this report, the Fort Calhoun Nuclear Plant suffered a 'catastrophic loss of cooling' to one of its idle spent fuel rod pools on 7 June after this plant was deluged with water caused by the historic flooding of the Missouri River which resulted in a fire causing the Federal Aviation Agency (FAA) to issue a "no-fly ban" over the area."

But, the website of the Omaha Public Power District (OPPD) issued a very interesting "denial".

"... the Fort Calhoun Nuclear Plant is owned by Omaha Public Power District (OPPD) who on their website denies their plant is at a 'Level 4' emergency by stating: 'This terminology is not accurate, and is not how emergencies at nuclear power plants are classified'."

Notice this power company did not deny that a terrible nuclear disaster had occurred; no, they focused on the "terminology", splitting hairs on whether the "terminology was accurate".

"Russian atomic scientists in this FAAE report, however, say that this OPPD statement is an 'outright falsehood' as all nuclear plants in the world operate under the guidelines of the International Nuclear and Radiological Event Scale (INES) which clearly states the "events" occurring at the Fort Calhoun Nuclear Power Plant do, indeed, put it in the 'Level 4' emergency category of an "accident with local consequences" thus making this one of the worst nuclear accidents in US history."

Once again, we have the spectacle of a President of the United States lying to his people. But, what makes this so incredibly terrible is that this President campaigned on the slogan of "transparency" in office. Truly, there is no difference between leaders of the two American parties. We would have expected this type of cover-up from "Tricky Dick" Nixon, but Obama claimed he was different.

The Japanese nuclear disaster grows more serious.

NEWS BRIEF: "[Fukushima: Strontium levels up to 240 times over legal limit near plant, uninhabitable land area now the size of 17 Manhattans](#)", Ethan A. Huff, staff writer, Natural News, June 19, 2012

"Representing the first time the substance has been detected at the crippled plant, the Tokyo Electric Power Company (TEPCO) reported on Sunday that seawater and groundwater samples taken near the ravaged Fukushima Daiichi nuclear power facility in Japan have tested positive for radioactive strontium. And according to a recent report in The Japan Times, levels of strontium detected were up to 240 times over the legal limit, indicating a serious environmental and health threat."

"Radioactive strontium, which is known to accumulate in bones and eventually lead to diseases like cancer and leukemia, is one of at least three 'hot particles' being continually released by the damaged plant, according to experts. The others include radioactive cesium and plutonium, both of which are implicated in causing birth defects, cancer, and death."

All of Japan seems to be at risk now.

" 'We are discovering hot particles everywhere in Japan, even in Tokyo', said Arnold Gundersen, a former nuclear industry senior vice president with 39 years of nuclear engineering experience ... 'Scientists are finding these everywhere Over the last 90 days these hot particles have continued to fall and are being deposited in high concentrations. A lot of people are picking these up in car engine air filters'."

Therefore, we should expect a skyrocketing cancer rates in Japan and elsewhere throughout the world.

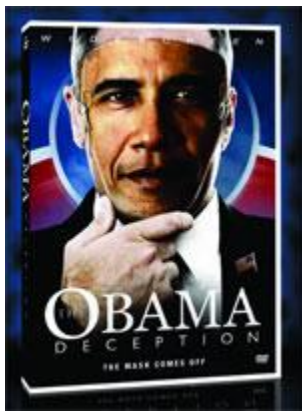

During the 1990's, I was curious as to why governments throughout the world systematically supported making nuclear power a backbone of their national power needs. After all, had Chernobyl taught us that nuclear power plants can suddenly go into a meltdown and when they go bad, they can kill a lot of people. After all, how many people fear explosions in a coal fired power plant?

Furthermore, the disposal of spent fuel rods is a tricky matter for the next 4.5 billion years.

It just seemed to me that nuclear power plants were too risky to keep building them But, we were continually reassured that they were safe and nearly "foolproof" in operation.

But, when the [Illuminati Card Game](#) included a card of a "Nuclear Accident", the entire world should have noticed and should have immediately demanded that governments throughout the world shut down nuclear power plants, not keep building them.

We have played directly into the hands of the radical "Mother Gaia" group. This group has always stated that our current Industrial Civilization is placing too much stress on Mother Earth (Gaia) and must be either shut down or dramatically curbed. One day, after Antichrist has arisen and has assumed power over all the Earth, he will announce that modern civilization is ruining Mother Gaia; he will use his immense global power to shut down our modern civilization and implement the ["re-wilding" plan](#), whereby over 50% of all land will be closed to normal human activity.

That is where this entire situation is heading.

II. Is President Obama going to be a one-term President?

He apparently is considering the idea!

NEWS BRIEF: "[Barack Obama: there are days when I say one term is enough](#)", The Telegraph (London), 14 June 2011

"He said first lady Michelle Obama would be the first to encourage him to do something 'a little less stressful' if she no longer believed in what his administration was doing ... There were, he conceded, days when he thought 'one term was enough', but 'if the family is doing well and Michelle is putting up with me I've got enough energy to do the work I am doing'."

With her husband facing a difficult re-election in November 2012 thanks to the poor economy, Mrs Obama has recently begun extolling his 'tireless' work rate ... "

If the President is at the point where he publicly pronounces his feeling that "one term might was enough", that is a very significant event and one we should not ignore. This next article goes even further.

NEWS BRIEF: "[10 Reasons Obama is a One-Term President](#)", by Daniel Flynn, Human Events, 6/20/2011

"Less than two months ago, buzzing from the president's gutsy call to eliminate Osama bin Laden, liberal pontificators had practically sworn in Barack Obama for his second term ... In reality, the president's short-term popularity boost had fried the long-term judgment of his supporters. The reasons to believe Obama a one-term president are many and well-grounded.

10) "The Declaration of Independents" - "Candidate Obama attracted independents. President Obama repulses them."

9) "A Redder America" (More Republican) - "Barack Obama faces a redder electoral map than he did in 2008 ... Most of the states gaining electoral votes in the census reapportionment voted for McCain. Almost all of the states losing electoral votes voted for Obama."

8) "The Issues Have Changed" - "Gallup's 'Monthly Most Important Problem' survey is a problem for the president ... It's difficult to see how he scores points in 2012 on the issues that resonate with voters. He will be on his heels."

7) "The Blank Canvass Isn't Anymore" -- "Unpopular ObamaCare, a sedative stimulus, ineptness in the face of the BP oil spill, and defiance of Congress in starting a third Middle Eastern war have all painted a presidential picture that has calcified conservative opposition, alienated moderates, and disillusioned liberal supporters."

6) "Demoralized Liberals" - "Leftists may not primary this president or siphon votes through a suicidal third-party bid. But neither will they work or give at the levels they did in 2008."

Obama has alienated so many of his Liberal supporters because he has seemed to be a reincarnation of George W. Bush on too many issues!

5) "Energized Conservatives" - "From tea-parties to raucous town halls, the political dynamic of the country has been altered ... Nothing invigorates a party's base like an aggressive ideologue of the opposing party occupying the White House. The GOP clearly has the momentum heading into 2012."

4) "The Political Ground Has Shifted Beneath the President's Feet" - "Between the 2008 survey and last year's, conservatives have gained seven points vis-à-vis liberals. To know liberalism isn't to love it."

3) "Historic Turnouts Aren't Every-Four-Year Occurrences" - "Obama surfed to victory in 2008 on the crest of two historic waves. African Americans constituted a larger percentage of the electorate than ever recorded. And young people voted for the Democratic candidate by the greatest margin ever ... That both groups have been hit especially hard by the economic slump makes it hard to envision a repeat of the amazing African American turnout and one-sided youth vote. "

2) "A Low Ceiling" - "... the assassination of America's most reviled enemy revealed Barack Obama's political weaknesses, not his strengths ... The best possible week of Obama's presidency yielded barely half of the electorate's support. His enemies should acknowledge the man has a floor of support. His supporters should acknowledge he has a ceiling, too."

1) "It's Still the Economy, Stupid" - "The 'Misery Index', popularized by Governor Carter to hound President Ford only to be President Carter's undoing, haunts Democrats again ... Even a browbeaten Bill Daley, the president's chief of staff, conceded to an incensed National Association of Manufacturers convention, 'Sometimes you can't defend the indefensible'. He said it. "

"... occupants of the White House have lost general elections just five times in the last hundred years. But he has governed ineffectively and stubbornly against the wishes of the American people. He could win reelection. But the preponderance of indicators suggests his defeat."

If this trend continues, and if Mitt Romney continues to win over the Republican Party faithful, 2012 could turn out to be the year of the Mormon, just in time to save the Constitution!

III. The North Korean nuclear confrontation is back in the news again!

The Plan of the Elite: "A hair-raising nuclear confrontation in Korea may, towards the end of the period, threaten man's very survival." (Peter Lemesurier, "The Armageddon Script", p. 222-223)

NEWS BRIEF: "[Top Strategist Says North Korea Will Be Able To Nuke The U.S. By 2012](#)", by Gus Lubin, Business Insider, June 18, 2011

"North Korea will have developed a compact nuclear warhead that can be attached to ballistic missiles and fired onto the U.S. mainland by next year, a top strategist predicted this week. This scary warning comes from Larry Niksch, a senior associate at a prominent bipartisan thinktank, Center for Strategic and International Studies ..."

The "Center for Strategic and International Studies" is an Illuminati think tank, so this announcement represents something the Global Elite wants us all to very afraid over; indeed, the subject is very frightening!

"Although North Korea's economy is in disarray, everything changes once militarization reaches a certain threshold. Kim Jong-il already named the Libyan intervention as an example of what happens when countries give up nuclear weapons -- don't expect him to do the same."

Kim Jong-il noted during the invasion of Iraq in 2003 that this type of invasion occurs to countries who do not have nuclear weapons. His statement to this effect was one of the very first bold statements by a national leader which told us that Bush was lying when he said that Saddam Hussein posed a threat to the world with his nuclear weapons. Several years after the invasion, Bush's own commission on 9/11 admitted that Iraq possessed no nuclear weapons, admitting that he had abandoned his program in 1992, shortly after his defeat at the hands of the American-led Coalition determined to throw him out of Kuwait.

This next news article tells us exactly what kind of new nuclear weapon North Korea may possess.

NEWS BRIEF: "[North Korea Tests 'Super-EMP' Nuke](#)", News Max, 16 June 2011

"North Korea's last round of tests, conducted in May 2009, appear to have included a "super-EMP" weapon, capable of emitting enough gamma rays to disable the electric power grid across most of the lower 48 states, says Dr. Peter Vincent Pry, a former CIA nuclear weapons analyst and president of EMPact America, a citizens lobbying group."

Once again, the source for this news story is the CIA so this is a story which the Illuminati wants us to hear.

Nevertheless, the wording of the sentence in "The Armageddon Script" convinces me that this threat is not empty; rather, it is an action the Illuminati is going to take in order to panic the world so much during World War III that all citizens from every area of the globe will embrace the "peace" offered by Antichrist. Note the wording again of Peter Lemesurier, a top New World Order author in the 1980's:

"A hair-raising nuclear confrontation in Korea may ... threaten man's very survival."

The best way to ensure that people will be so scared by this crisis as to experience a "hair-raising" panic and to literally believe that mankind may not survive this crisis, is for North Korea to take out at least one target -- probably American. If he took out an American city on the East Coast, he would not only demonstrate the fact that he has nuclear weapons, he has also demonstrated that he has the ballistic missile which can deliver warheads 10,000 kilometers away.

We posted an article in 2003 reporting that North Korea had this ballistic missile range then! Read [NEWS1781](#), entitled, "North Korea Has 100 Nuclear Warhead Arsenal And Intercontinental Ballistic Missiles To Deliver Them To New York City".

Listen to what another New Age author say about hitting New York City with a nuke:

"It is true that without the population or the bomb problem, the elect would use some other excuse to bring about the New World Order. They have plans to bring about things like earthquakes, war, the Messiah, extraterrestrial landing, and economic collapse. They might bring about all of these things just to make ... sure that it does work. They will do whatever is necessary to succeed. The Illuminati has all the bases covered ... Can you imagine what would happen if Los Angeles is hit with a 9.0 quake, New York City is destroyed by a terrorist-planted atomic bomb, World War III breaks out in the Middle East, the banks and the stock markets collapse, Extraterrestrials land on the White House lawn, food disappears from the shelves, some people disappear, the Messiah presents himself to the world, and all in a very short period of time?" [William Cooper, "**Behold A Pale Horse**", Page 177]

Cutting Edge first reported in 1997 that the Illuminati Plan includes a significant role for North Korea as the Third World War unfolds. To date, we continue to be the only source for this incredible story! These current news articles prove that this plan for a nuclear confrontation with North Korea is still on track and is still planned.

We believe the World War III scenario is as follows:

1) In the Middle East, Israel is annihilating her Arab protagonists, and America is fully engulfed in war with Iraq and other Arab states, setting the stage for the planned appearance of Antichrist

2) North and South Korea and the United States, begin a short period of a 'war of words'. War rhetoric will suddenly ratchet up, planting the idea firmly in people's minds that North Korea really can present a mortal threat to the U.S. The planned nuclear confrontation is underway.

3) China suddenly invades Taiwan.

These three conflicts would give the world its Third World War.

The appearance of Antichrist would follow rapidly.
