I. Combined disasters are striking America and Japan!

The nuclear power industry seems certain to have absorbed a fatal blow from all these disasters.

NEWS BRIEF: "[Fukushima Spews, Los Alamos Burns, Vermont Rages and We've Almost Lost Nebraska](#)", Daily Kos News, June 29, 2011

"Fukushima Spews, Los Alamos Burns, Vermont Rages and We've Almost Lost Nebraska Humankind is now threatened by the simultaneous implosion, explosion, incineration, courtroom contempt and drowning of its most lethal industry. We know only two things for certain: worse is yet to come, and those in charge are lying about it---at least to the extent of what they actually know, which is nowhere near enough."

From the beginning of the Japanese earthquake and tsunami on March 11, we have seen repeated lying and coverup from government and industry officials. Last week, President Obama was accused of covering up the nuclear disaster at the power plants in Nebraska! Citizens are used, by now, to expect incompetence and outright lying from government officials, to the point where many citizens now do not believe a word their government is telling them.

Do you remember that Doc Marquis revealed, in his DVD, "[The Protocols of Zion: The Plot Against Israel](#)", that the Illuminati fully intended to deliberately destroy the faith of the people in their government leaders? In the Protocols, we read:

- 1) **"... the word should not agree with the deeds of the diplomat."** [Protocol #7] Not only is lying permitted, it is required! How can we ever believe anything any leader involved in the coming New World Order, says?
- 2) **"Only one trained from childhood for independent rule can have understanding of the words that can be made**

up of the political alphabet." [Protocol #1] Notice that, in their minds, a completely different alphabet, language, exists other than the normal language spoken by the people

3) **"Moreover, the art of directing masses and individuals by means of cleverly manipulated theory and verbiage, by regulations of life in common, and all sorts of other quirks, in which the [common people] understand nothing, belongs likewise to the specialists of our administrative brain."** [Protocol #4] These leaders are deliberately schooled in how to speak deceptively. After they have spoken this way long enough, they are simply able to do it without thinking specifically, even on the spur of the moment. Thus, they can appear to be so natural, so full of empathy, when lying.

4) **"The principal object of our directorate consists in this: to debilitate the public mind by criticism; to lead it away from serious reflections calculated to arouse resistance; to distract the forces of the mind towards a sham fight of empty eloquence. In all ages the peoples of the world, equally with individuals, have accepted words for deeds, for they are content with a show and rarely pause to note, in the public arena, whether promises are followed by performance. Therefore, we shall establish show institutions ..."** [Protocols #5; reiterated in Protocol #10] This single paragraph tells us all we need to know about politicians of both parties. They deliberately intend "debilitate" our minds and to "distract" us through "sham" speeches of "empty eloquence". We certainly have seen and heard enough of this type of speaking to last us a lifetime! You can just put the name of any number of politicians on both sides of the aisle that fit this description. Talk, talk, and talk some more, is the motto of the consummate politician.

Now, let us return to the Combined Disasters as enunciated by this current news story:

"FUKUSHIMA: The bad news continues to bleed from Japan with no end in sight. The "light at the end of the tunnel" is an out-of-control radioactive freight train, heading right into a beleaguered planet ... Tokyo Electric and the Japanese government have admitted to three 100% meltdowns but can't confirm with any reliability the current state of those cores. There's reason to believe one or more have progressed to "melt-through" in which they burn through the thick stainless steel pressure vessel and onto the containment floor. The molten cores may be covered with water. But whether they can melt further through the containments and into the ground remains unclear. "

"Tokyo Electric and the Japanese government have admitted to three 100% meltdowns but can't confirm with any reliability the current state of those cores There's reason to believe one or more have progressed to melt-through in which they burn through the thick stainless steel pressure vessel and onto the containment floor. The molten cores may be covered with water. But whether they can melt further through the containments and into the ground remains unclear. "

Meanwhile, radiation from Fukushima is leaking into the Pacific Ocean. Some fish and whales have been tested and they show high levels of radiation. Since health experts have been saying that we are under no danger unless we eat contaminated food, what are the Japanese people eating? Even fish caught in other areas of the ocean can be contaminated from the radiation oozing out into the Pacific from the stricken nuclear power plant.

"LOS ALAMOS: A massive wildfire has swept at least to the outskirts of the national laboratory that was at the core of the program that built the Atomic Bomb .. There are significant quantities of stored radioactive material

in and around Los Alamos. How much there is, where it is, how badly it is threatened, how much (if any) has already been engulfed in flames remains to be seen. Evacuations are underway. "

"Official reassurances are not reliable. Nor are estimates of the potential for radioactive fallout to spread throughout North America and beyond."

"VERMONT YANKEE: Entergy, the owner of the one reactor in Vermont, has sued to shred a solemn public contract ... Years ago the Entergy needed official permission to expand VY's power capacity. It promised in return that the state could choose to shut the reactor on March 21, 2012, which it's now done. In recent years VY has spewed tritium into groundwater and the Connecticut River, in some cases from underground pipes whose existence the company denied. A cooling tower has collapsed."

The situation seems so critical regarding Entergy's operations that the NRC should be jumping at the chance to shut this troubled company down. Wrong!

"But the Nuclear Regulatory Commission has asked the federal Justice Department to intervene on behalf of the utility. The request trashes any credibility retained by the NRC. The Commission was established in the mid 1970s to be a disinterested party on which the public could rely."

"NEBRASKA: The flooding Missouri continues to threaten at least two heartland reactors. Late reports indicate Cooper may still be running, with public assurances it could be shut very quickly. What might happen if the operators are a little bit late has not been explained. Nor is there much to go on about the impacts of flooded cores and fuel cooling ponds on the Missouri and Mississippi Rivers or the eco-systems along the way to the Gulf of Mexico, still reeling from BP's toxic dose last year. "

The "Combined Disaster" card of the [Illuminati Card Game](#) is certainly being played out with a vengeance. Since the Illuminati has been screaming that our current Industrial Civilization is placing more demand on Mother Gaia than she can withstand, I am not surprised to learn that the nuclear power industry has been singled out for a permanent shutdown. Listen to the last section of this current news article, bearing in mind that Daily Kos is a very "green" news source:

"Whether the US will now turn with Germany, Japan, Italy, Switzerland, Israel and others away from atomic power and toward a green-powered Earth is up to us. The Solartopian technologies of wind, solar, tidal, geothermal, ocean thermal, bio-fuels, increased efficiency and conservation are now demonstrably cheaper, safer, cleaner, more reliable, more job-producing and quicker to install than anything atomic energy can promise ... The stream of reactor disasters spewing from this dying industry is certain to escalate. The toll rises with each leak at Fukushima, every flame at Los Alamos, each legal brief at Vermont Yankee, every foot of Nebraska floodwater."

"The time to stop the madness has long since passed."

II. High technology is again giving the coming dictatorship the means by which it can control you -- even within the sanctity of your own home!

NEWS BRIEF: ["Smart Meters: We can monitor everything you do in your home](#)

[\(Video\)](#)", Activist Post, June 28, 2011

"Although Smart Meters are promoted as energy efficiency components, the actual intent of these meters is to track your use of energy in real time across every 24hr. period, which will allow the provider to bill you for that period at the highest energy rate for the day. They have another purpose: thanks to Smart Meters, every appliance in your home will be monitored. As you will be rationed only so much energy for any 24 hr. period, opening and closing your refrigerator too many times during the daily billing cycle can cause your power to be disrupted. Your use of lights, appliances and even your time on the Net will be charged against your daily allowance of power."

This technology thus has the capability to monitor your daily routine within your home!

You can ignore the slick TV and magazine ads which tout the many "beneficial" capability of Smart Meter, because you know how the government and the utility company can abuse this system. The environmentalist radical must love Smart Meter, because it gives the utility the capability to force you to curtail you energy usage.

Al Gore must be smiling right now!

DVD

III. The Constitution is going to be in the news very, very often for the next 18 months!

Mormon candidates are planning to campaign on protecting the American Constitution, because they intend to fulfill Brigham Young's "White Horse Prophecy"!

NEWS BRIEF: "[Obama 'defiance' of Constitution earns impeachment call](#)", World Net Daily, June 30, 2011

"An organization that battles illegal immigration on behalf of the 75 percent of America's legal citizens who want more control over illegal immigration is calling for the impeachment of Barack Obama over his involvement in two issues: the transfer under his administration's jurisdiction of weapons to Mexican drug lords and his efforts to provide amnesty to illegal aliens. "

In addition to President Obama flaunting the Constitution with the issue of his birthplace and his birth certificate, he is now blatantly violating the Constitution in his
The group is a national organization with more than 40,000 supporters who represent the majority of Americans who want America's existing immigration laws enforced, Gheen said

<http://www.wnd.com/?pageId=316881#ixzz1QlXrAc4R>

"President Obama is no longer the legitimate president of the United States," said William Gheen, president of

Americans for Legal Immigration PAC..."

Mr. Gheen continues:

" By arming drug and human smugglers with assault weapons that have been used to kill American and Mexican citizens and police forces, and by ordering amnesty for illegal aliens which has been rejected by both the Congress and the American public more than eight times, Obama has committed a form of treason against the United States and must be removed from office by Congress," he said.

"The group is a national organization with more than 40,000 supporters who represent the majority of Americans who want America's existing immigration laws enforced, Gheen said"

Americans need to understand that the Obama Administration, like the Bush and the Clinton Administrations before him, are enforcing the REAL immigration policies; these policies are just not what the average American citizen thinks they are. Since Clinton, Bush and Obama are committed to the establishment of the North American Union, they are enforcing the ultimate immigration rules of that new supnation.

And, these new immigration rules will recognize all Canadians, all Americans and all Mexicans as North American citizens! That is the real immigration policy our government is following! Doubt it not!

What does this news story have to do with the Mormon Church and the two Mormons currently running for President?

Remember that Brigham Young had a prophetic vision for America at the End of the Age. In his vision, he saw that the American Constitution was facing destruction and was literally "hanging by a thread". At the last possible moment, a Mormon wins the Presidency and saves the Constitution. Today, America has two Mormons running for President on the Republican ticket -- Mitt Romney and Jon Huntsman.

President Obama is continuing the assault on the Constitution which was begun by Presidents Clinton and George W. Bush. The scene is set for a Mormon candidate to ascend to the White House, either by winning the election or by being Vice-President when the President dies in office. You can read full details of this incredible Mormon prophecy in [NEWS2226](#), entitled, "**Republican Mitt Romney and the "Mormon Plan for America"**".

These are most interesting times, don't you agree?

Steve
